Chorale & Shaker Dance

John Zdechlik (b.1937)

Grade 4

Unit 1: Composer

John Zdechlik was born in 1937 in Minnesota. He first learned how to play trumpet and then later piano. At a young age he was playing gigs around town and also beginning to arrange (Zdechlik, “About”). He attended the University of Minnesota where he received a bachelor’s degree in music education, and later earned his master’s degree in theory and composition. He taught at the collegiate level while earning his master’s, and continued teaching there after he completed a Ph. D. in composition in 1970 (Miles 234). After finishing his education he accepted a post as a faculty member at newly established Lakewood Community College, where he served as the chair of the music department and director of bands. In 1989, he was elected to member to the American Bandmaster’s Association. He is credited with establishing the school’s jazz program, including a jazz program for adult alumni. Zdechlik was also responsible for the organization of the Century College Jazz Festival, which still occurs annually every year. He retired in 1997 and lives with his wife in Minnesota (Bennett 289). Zdechlik is best known for his Chorale and Shaker Dance, but has numerous other works for band such as Faces of Kum Ba Yah, Lyric Statement, Psalm 46, and Dance Variations (Zdechlik, “Published Works”). He has also written a number of works for small ensembles and solo repertoire, along with a number of unpublished works available to be ordered from him personally (Zdechlik). He is well known for writing in theme and variation form (Miles 234).
Unit 2: Composition

*Chorale and Shaker Dance* bases its main theme around the famous Shaker hymn *Tis a Gift to be Simple*. The piece premiered in 1972 at the MENC National convention by the Jefferson High School Band, who commissioned the piece originally (Miles 234). Due to a growing amount of band directors concerned that his original score was too hard for most high school bands, in 1989 Zdechlik published *Chorale and Shaker Dance II* (Bennett, 295). The piece totals 9 minutes, and is considered a Grade 4 composition. It is recommended for advanced high school bands and college level groups. The work serves as a useful tool in introducing bands to Theme and Variation form, as well as more advanced rhythms, tonal centers, and harmonies. Zdechlik admits that his passion for jazz heavily influenced many of his works, including *Chorale and Shaker Dance*. He is quoted as saying:

“For instance, at certain points in *Shaker Dance* those are all jazz rhythms…it all has that kind of jazz ‘lift’ to it” (Miles 290).

Unit 3: Historical Perspective

At the time the piece was written, the high school concert band as a medium was flourishing (Miles 235). Most music written during this time period was for the high school concert band specifically, with composers writing in the hopes that bands would perform more of their music in the future (235). Zdechlik says below why he feels his pieces were particularly successful:

“I think most of my pieces are successful structurally. …I am always very conscious of how we are getting from here to there…how the pieces moves forward in some kind of direction so it isn’t just wandering around. When I listen to some pieces I don’t like, I think I tend to not like them because they’re weak in
structure, or they’re repetitive with no purpose in mind, and they don’t lead from point to point in some kind of interesting, dramatic way” (Bennett 291).

Unit 4: Technical Considerations

| 1 - Piccolo | 2 - 2nd Eb Alto Saxophone | 1 - Baritone T.C. |
| 3 - 1st Flute | 2 - 1st & 2nd F Horns | 2 - Baritone B.C. |
| 3 - 2nd Flute | 2 - 3rd & 4th F Horns | 1 - Tuba |
| 1 - Eb Clarinet | 3 - 1st Bb Cornet | 2 - 1st Percussion: |
| 3 - 1st Bb Clarinet | 3 - 2nd Bb Cornet | Bells & Xylophone |
| 3 - 2nd Bb Clarinet | 3 - 3rd Bb Cornet | 2 - 2nd Percussion: |
| 3 - 3rd Bb Clarinet | 1 - 1st Trombone | Crash Cymbals & |
| 1 - Eb Alto Clarinet | 1 - 2nd Trombone | Suspended Cymbal |
| 2 - Bb Bass Clarinet | 2 - 3rd Trombone | 2 - 3rd Percussion: |
| 2 - Oboe | 1 - 1st Trombone | Snare Drum, Bass Drum |
| 2 - Bassoon | 2 - 3rd Trombone | & Triangle |

Instrumentation in Figure A, taken directly from the score.

Chorale and Shaker Dance uses a variety of tonal centers throughout the duration of the piece. There are no key signatures and all accidentals are written into the parts. The tonal centers tend to change diatonically around various themes, though there are sections that are very chromatic. Tonal centers include D, E-flat, F, A-flat, and B-flat (Miles 235). 3/2 and 2/2 meter are used during the piece, though the rhythms are not overly difficult. Attention will need to be paid to the syncopated rhythms, as well as various runs that appear throughout the piece. The range of the work is accessible for advanced high school players, with particularly high notes being preceded by a sequence that makes it easily attainable with preparation. There are a few solos (including clarinet, oboe, flute, alto sax, and timpani), including a clarinet 1 and clarinet 2 duet that features the syncopated rhythms mentioned earlier.
Unit 5: Stylistic Considerations

The beginning of the piece to rehearsal letter C is a chorale, so attention will need to be paid to blend and balance. The chorale passages contrast with faster rhythmic passages, so a change in style will need to be achieved by performers. Performers also need to be aware of the pedal points at any given point throughout the music. The low brass entrance at rehearsal letter R should be firm and powerful, and a heavier, powerful sound at rehearsal letter F is fine.

Unit 6: Musical Elements

It is important to identify tonal centers to students. Zdehlik uses tonal anchors to help give a feeling of tonal stability. Specifically, letters C-E are isolated solo sections, but are held together by a pedal D in the timpani. Other instruments help aide in this by taking turns sustaining the pedal tone, including the clarinets, horns, and the alto saxophones. The most common tonal center used is D, though a few others are present throughout the work including B-flat, F, C, A-flat, B, and E-flat.

The piece is written using theme and variation form, though canon is also present at rehearsal letters C and O.

Prelude, Siciliano, and Rondo

(A Three Movement Work)

Malcolm Arnold (1921-2006)

Grade 4

Unit 1: Composer

Malcolm Arnold was born on October 21st, 1921 in Northampton, England. His father was a shoe manufacturer, and both he and his mother had interest in music. Schooled at home, Arnold himself was not particularly interested in the trumpet until he heard Louis Armstrong play when he was twelve years old (Naxos). A few years later he was able to win a scholarship to the Royal College of music, where he studied composition with Gordon Jacob (Miles’276). After only two years of study at university he left to play second trumpet in the London Philharmonic Orchestra. During that time, he was also composing, and winning contests for string quartets (Naxos).

During World War II he continued playing with the orchestra but volunteered for service in 1943. He was quickly discharged after shooting himself in the foot. He played in the BBC Symphony Orchestra for a time before returning to the London Philharmonic as the principal trumpet player. After the war, he was able to support himself fully by composing (Harris). He wrote concertos for many instruments, nine symphonies, sinfoniettas, concert overtures and other orchestral works. He also is well-known for his movie scores, as well as a collection of solo and small ensemble literature. Arnold died on September 23rd, 2006 (Naxos).

Unit 2: Composition

Prelude, Siciliano and Rondo was actually arranged by John Paynter (1928-1996), who was Director of Bands at Northwestern University. Arnold originally
composed the piece as a brass band work entitled *Little Suite for Brass* op. 80. John Paynter's arrangement for band expands the music for percussion and woodwinds, while still retaining the characteristics and integrity of the original piece (Miles 276). The piece has also been arranged for orchestra.

**Unit 3: Historical Perspective**

This is a contemporary work in the style of English music written by Gustav Holst, Ralph Vaughn Williams, and Gordon Jacob. It is not unexpected to see Arnold’s composition professor Jacob on this list. Holst and Vaughn Williams were at the Royal Conservatory of Music nearly 40 years before Arnold, and Gordon Jacob was also a student there 20 years before (Harris). The folk melodies in the *Little Brass Suite* are very similar to those of the British Band Tradition (Miles 277).

**Unit 4: Technical Considerations**

The instrumentation is as follows:

- Piccolo
- Flute I
- Flute II
- Oboe I
- Oboe II
- English Horn
- Clarinet (in Eb)
- Clarinet I
- Clarinet II
- Clarinet III
- Alto Clarinet
- Bass Clarinet
- B-flat Contrabass Clarinet,
- Bassoon I
- Bassoon II
- Contrabassoon
- Alto Saxophone I
- Alto Saxophone II
- Tenor Saxophone
- Baritone Saxophone
- Cornet I
- Cornet II
First Movement

The flutes and xylophone have ascending Bm7 arpeggios in sixteenth notes at mm. 33. Syncopation is seen frequently in the high woodwinds and brass, and includes entrances on weak beats. The low brass and woodwind players will need to be able to play eighth note scales in the key of Db and F major at mm. 8, 22, and 23.

Second Movement

Overall, the meter is in 6/8, and tonal centers present include E-flat Major and B minor. The clarinets must execute sixteenth arpeggios at letter D in Eb, Bb minor, as well as augmented Ab, C dom 7, F minor 7, and Bb dom 7 (Figure B). The contrabass clarinet, English horn, string bass, and harp parts are all doubled and cross-cued by other members of the ensemble. The absence of these parts will not cause a large loss of musical material (Miles 277).

Third Movement

Overall: Rhythms are more demanding than the other movements, especially in regards to syncopation and technical demands. The tempo is much faster at the quarter note=152. As in other movements, the Harp, String Bass, English Horn, Contrabass Clarinet, and Contrabassoon parts are doubled in other parts, so the part is not lost if those instruments are not covered. The high woodwinds must execute a sixteenth note
scale after letter B, so students should be familiar the Bb melodic minor scale. The low woodwinds and brass also experience this scale. Brass players will need to be able to double-tongue from rehearsal letter F to rehearsal letter G. All players should have a solid understanding of the scales that each sixteenth note run is based on.

Unit 5: Stylistic Considerations

Like most of Arnold’s music, this piece is very light hearted and harmonious, which follows in the tradition of British music. The music should have a noble feel to capture the spirit of Arnold’s intent. There should be an overall light-hearted approach to the piece (Harris).

First Movement
The beginning of the piece is a fanfare, so articulation is important. This includes playing with a detached style, as well as making a distinction between staccato and marcato markings. This will call attention to the eighth and sixteenth note rhythms in the fanfare. Overall, balance and blend is crucial, so that one texture does not overwhelm any other. The snare drum will need to be heard through the chords played by the ensemble (Miles 278).

Second Movement
This section should be light, with careful attention paid to releases. Dynamics are used to shape the melody of this piece, with students striving to achieve a ‘singing style’. The 6/8 meter cannot feel forced or labored. This movement has accompaniment ostinato patterns throughout, but performers must take care that the eighth notes are played tenuto, and not short. All releases should be treated delicately, with tapered ends (Miles 278).

Third Movement
Accents are important in this movement in order to execute the rhythmic style properly. Dynamics and different styles of articulation add a wide range of expression to this movement. Students will need to be mindful of the contrasting styles, especially
since they change quickly (Miles 278). Careful balance needs to be maintained between the syncopated accompaniment and the main theme of the song.

Unit 6: Musical Elements

Each movement of this suite has the same basic form, ABACA with introduction and coda. The third movement has no introduction.

First Movement

Polyphony is used, as well as countermelodies. The piece begins with a fanfare that returns at the end of the movement. In the first two movements there are times when much of the ensemble is resting and a chamber music group within the larger ensemble is playing. These ensembles change characters as well. This means there should be lots of listening and reacting going on among the ensemble. Performers must be aware of multiple entrances on weak beats.

Second Movement

Different tonalities are present during this movement, including E-flat major and B minor. Performers must be aware of musical phrasing and direction at all times. Most phrases can be broken down into four bar segments (Miles 279). Conductors should make students aware of different compositional techniques present, such as borrowed chords and chromatic harmonies (Miles 279).

Third Movement

The same use of tonalities in the second movement are also present in the third movement. Rhythms are repetitive including a bass line and an accompaniment that is syncopated. Sections of music are easy to distinguish between each other due to differences of texture between each. This movement also uses borrowed chords and chromatic harmonies, as well as antiphony between different groups of instruments (Miles 279).

American Elegy

By Frank Ticheli (b. 1958)

Grade 4

Unit 1: Composer

Frank Ticheli was born in Monroe, Louisiana in 1958. He received a bachelor’s degree from Southern Methodist University in 1981, and received his Master’s and Doctoral Degree from The University of Michigan in 1983 and 1987. Ticheli has studied with Leslie Bassett, William Bolcom, William Albright, George B. Wilson, and Donald Erb (Naxos). He has composed works for orchestras, choirs, and concert bands. He was the Pacific Symphony's composer in residence from 1991 to 1998, composing numerous works for that orchestra. Many of his works for concert band are considered staples for the genre, including his American Elegy (Blaufuss). Ticheli currently lives in Los Angeles, California, where he is a Professor of Composition at the University of Southern California. Other famous works for concert band include Angels in the Architecture, Loch Lomond, and Vesuvius. A version of American Elegy was also transcribed for orchestra, and Ticheli has written several works for solo instruments with orchestra accompaniment. He has won numerous awards for his compositions, including First Prize, 30th Annual National Band Association William D. Revelli Memorial, the Charles Ives Scholarship, American Academy of Arts and Letters, and First Prize, Virginia College Band Directors’ Symposium for New Band Music (Naxos).

Unit 2: Composition

Frank Ticheli is known for using a using many different textures as well as colors in his writing, maintaining a balance between writing freely yet with cohesion. Ticheli’s music is harmonic with melodic development being a secondary goal (Blaufuss, 2008).
Ticheli also uses the orchestration to bring out dynamics and accented sections within the music. Ticheli is a tonal composer, but that he doesn’t necessarily have a tonal center in mind while writing (Blaufuss, 2008). Instead of writing a piece from the beginning to the end, Ticheli writes the segments out of order and allows the process to be fluid and creative, rather than linear and restrictive (Blaufuss, 2008).

Unit 3: Historical Perspective

On April 20th, 1999 Columbine High School students and faculty were witnesses to a terrible tragedy. Two teenage students entered the building, shooting and killing students and faculty members (CNN.com). *An American Elegy* was commissioned by the Columbine Commissioning Fund, a special project sponsored by the Alpha Iota Chapter of Kappa Kappa Psi at the University of Colorado on behalf of the Columbine High School Band. Contributors to the Fund included members, chapters, alumni, and friends of Kappa Kappa Psi and Tau Beta Sigma National Honorary Band Fraternity and Sorority (Naxos). The work received its premiere performance by the Columbine High School Band, William Biskup, director, Frank Ticheli, guest conductor, on April 23, 2000. Its premiere served as the centerpiece of a special commemorative concert given by the Columbine High School Band in conjunction with the University of Colorado Wind Symphony, held at Macky Hall in Boulder, Colorado (Naxos).

Unit 4: Technical Considerations

The instrumentation of this piece is as follows:

- Flute 1
- Flute 2
- Oboe 1
- Oboe 2
Clarinet 1
Clarinet 2
Clarinet 3
Bass Clarinet
Contrabass Clarinet
Alto Saxophone 1
Alto Saxophone 2
Tenor Saxophone
Eb Baritone Saxophone

Bb Trumpet 2
Bb Trumpet 3
F Horn 1
F Horn 2
Trombone 1
Trombone 2
Trombone 3
Euphonium (Baritone Clef)
Euphonium (Bass Clef)
Tuba
String Bass
Timpani
Percussion 1
Percussion
There are many areas of the music in this piece that are exposed or solos, and students must have a developed ability to listen and adjust for intonation where needed. Long extended notes mean that tone quality is especially important. The rhythms in the piece are accessible for all high school students, and there are three solo opportunities for off-stage trumpet, alto saxophone, and oboe. This piece can present a challenge since performers must be listening to each other and be aware of how each part fits in with their own.

**Unit 5: Stylistic Considerations**

Measures 1-14 mark the introduction of the work. According to Ticheli, everything within the opening section is building to measure 9 and should ascend to an “exalted statement of hope” (Ticheli, 2000). The introduction ends with sixteenth notes, which echo each other. At measure 15 the main theme is presented by the French Horns. It is recommended that the conductor stretch the first two eighth notes of the theme, setting the notes apart from the rest of the phrase. These two notes are used later as connecting material within the work (McMurray, 2004). Suspensions are used throughout the piece, beginning at measure 25. It is important that these suspensions be the main focus of the music when they occur. The piece climaxes to the Columbine Alma Mater at measure 111. For the off-stage trumpet solo at 118, the trumpet needs to be balanced carefully with the rest of the ensemble. The solo should feel like it is coming from a very beautiful place, and at a very long distance (Ticheli, 2000).

In order for students to prepare better for this piece, melody sheets could be created to rehearse in warm-ups.

**Unit 6: Musical Elements**

Ticheli considers himself to be a tonal composer (Blaufuss, 2008). *An American Elegy* is mostly homophonic, with exception to the four-part canon that occurs at measure 97. Ticheli uses block chords to convey strength two separate times during the work,
including measures 41 and 111. Ticheli uses this technique to symbolize unity and strength (McMurray, 2004).

The piece uses motives, starting at measure 15 in the French Horns with the main theme. Those two notes are seen again in measures 29, 61, and 95 connecting sections of material together. Ticheli also uses many instances of perfect 4ths.

**Unit 7: Form and Structure**

*An American Elegy* has no set form, which is characteristic of many pieces by Ticheli. In the concert notes for *An American Elegy*, Frank Ticheli provides a logical framework and key structure for this piece of music.

Unit 9: Additional References and Resources

Greensleeves

By Alfred Reed (1921-2005)

Grade 3

Unit 1: Composer

Alfred Reed was born in New York City in January of 1921. He began studying the trumpet at age 10. During World War II, he served in the 529th Army Air Force Band. Following his military service, he attended the Juilliard School of Music, studying under Vittorio Giannini (Jordan 7). Following his studies there, Reed worked as a composer and arranger for TV and radio networks, including ABC and NBC (Jordan 12). 1953, he became the conductor of the Baylor Symphony Orchestra at Baylor University, where he received his B.M. in 1955 and his M.M. in 1956 (Jordan 20). From 1955 to 1966, he was the executive editor of Hansen Publications, and was professor of music at the University of Miami where he worked with composer Clifton Williams from 1966 until 1976 (Jordan 24). Reed founded the first music business curriculum at the University of Miami in 1966. Reed has over two hundred published works for concert band, orchestra, chorus, and chamber ensemble (Jordan 25).

Unit 2: Composition

Reed wrote Greensleeves in response to a request for the popular English folk song to be set for a wind band. It was so popular, that in 1979 he also transcribed it for orchestra (Aldrich 110). The latest edition of the song is dated at 1993.
Unit 3: Historical Perspective

Historically, King Henry VIII has been credited as being the author of this traditional English song though there is no concrete evidence to support this (Church, 2004). The first existing reference to this song called it "a new Northern Ditty", and is in a manuscript dated from 1580, 33 years after the monarch’s death (Church). William Shakespeare mentions this song by name twice in *The Merry Wives of Windsor*, and the traditional song has seen many variations throughout the centuries. This culminated in the popular Christmas carol *What Child is This?* written in 1865 by William Chatterton Dix to the original tune of *Greensleeves*. (Church).

Unit 4: Technical Considerations

The instrumentation for this piece is as follows:

- Piccolo
- Flute 1/2
- Oboe 1/2
- Clarinet 1
- Clarinet 2
- Clarinet 3
- Alto Clarinet
- Bass Clarinet
- Contrabass Clarinet
- Bassoon 1/2
- Alto Saxophone 1
- Alto Saxophone 2
- Tenor Saxophone
- Baritone Saxophone
- Trumpet 1
- Trumpet 2/3
French Horn 1/2  
French Horn 3/4  
Trombone 1  
Trombone 2/3  
Euphonium  
Tuba  
String Bass  
Percussion (Bells, Chimes)  
Timpani

The piece begins with solo horn, clarinet, oboe, and flute. This introduction reappears as a coda at the end of the piece. Players should be familiar with the key of Concert G harmonic minor, as the woodwinds will have to execute eighth note patterns using that particular scale. At rehearsal letter F the key modulates to Concert C minor. At rehearsal letter J the key returns to Concert G minor.

Intonation is important in this piece, especially in the introduction and coda where the tonalities of individual players will be extremely exposed. Players should not only be listening to for pitch, but also to how each part aligns.

**Unit 5: Stylistic Considerations**

The style of *Greensleeves* is straightforward and unchanged from what students and audience members know of the traditional carol. This is characteristic of Alfred Reed’s writing style (Aldrich, 2004). Conductors should be careful not to rush the tempo. The beginning of the score states it should be “Moderately slow, with expression”. The piece maintains the same tempo until two measures before Rehearsal letter J, where the words “poco a poco allargando al” (little by little, in a broadening manner) appear. Rehearsal letter J instructs players and the conductor to perform “broadly and very sustained”.
Contrasting dynamics are key to this piece. Six measures before rehearsal letter N the ensemble is at fortississimo, only to decrescendo to pianissimo one measure before rehearsal letter N. Being aware of which voice has the melodic line will be important to dynamic levels, since the melody jumps to different voices within a verse or refrain. An example of this is seen at rehearsal letter I, where the flutes and oboes begin the refrain, only to have the clarinets answer the rest of it three measures later.

**Unit 6: Musical Elements**

The melody of the piece (including verses and accompaniment) is presented a total of three times. The piece begins with an introduction before going into the first verse and refrain. There are a few measures of transitional material between each refrain and the next verse that are contrapunctal and tie each section together. The coda ends the piece, being very similar to the introduction. Percussion is strictly limited to metallic instruments and timpani, with instrumentation starting light and soloistic in the beginning, building to a full ensemble by the third statement of the melody, and then tapering off again to woodwind solos at the end.

Coventry Christmas

By Larry Neeck (b. 1950)

Grade 2 ½

Unit 1: Composer

Larry Neeck has written over one hundred works for concert and jazz ensemble published by C.L. Barnhouse Company. He has been commissioned to write for concert band, jazz ensemble, and orchestra. He also works as a guest conductor and clinician (Neeck, 2014). He has received ASACP awards for his compositions. Neeck holds a B.A. in Music from the University of Pittsburgh, and an M.M. in Music Education from the Eastman School of Music. He is a member of the American Society of Composers, Authors, and Publishers (ASACP), NAfME (National Association for Music Education), New York State School Music Association (NYSSMA), and the New York State Band Directors Association (Neeck, 2014). Neeck also teaches instrumental music in the Webster Central School District in the state of New York. He duties include concert bands, jazz bands, and he also founded and directs the Willink Middle School Student/Parent Band (Neeck, 2014).

Unit 2: Composition

A Coventry Christmas is written for young band, and is based on the traditional English carol Coventry Christmas. The piece was written in 2003, and uses theme and variation form.
Unit 3: Historical Perspective

The name of the traditional carol comes from the town of Coventry in 16th century England. Every year, the town would have a Christmas play depicting the same scene from the Bible. This scene was based off of chapter two from the Gospel of Matthew, in which King Herod famously gives the order for his soldiers to seek out and kill all male children aged 2 and under (McDonald, 2012). This was done due to his fear of the coming of the Messiah, who he feared would dethrone him. During the telling of the story, the carol is sung as a lullaby by the mothers to their children who they know will soon die (McDonald). The text for the actual carol is taken from a 16th century manuscript, and is still used today:

"Lully, lullay, Thou little tiny Child,
Bye, bye, lully, lullay.
Lullay, thou little tiny Child,
Bye, bye, lully, lullay.
O sisters too, how may we do,
For to preserve this day
This poor younpling for whom we do sing
Bye, bye, lully, lullay.
Herod, the king, in his raging,
Charged he hath this day
His men of might, in his owne sight,
All young children to slay.
That woe is me, poor Child for Thee!
And ever mourn and sigh,
For thy parting neither say nor sing,
Bye, bye, lully, lullay" (McDonald, 2012).

Unit 4: Technical Considerations
The instrumentation for this piece is as follows:

Flute
Oboe
Bb Clarinet 1
Bb Clarinet 2
Bb Bass Clarinet
Eb Alto Saxophone
Bassoon
Bb Trumpet 1
Bb Trumpet 2
F Horn
Trombone 1
Trombone 2
Baritone (Bass Clef)
Tuba
Percussion 1
Percussion 2
Timpani
Bells

For younger students, this song has a blend of familiar elements as well as parts that are challenging. This piece serves as a good introduction to accents and marcato, as well as style and detail to articulation. The trumpets use straight mutes at measure 13, though it is marked in the score as an optional solo or soli with the entire section. In measure 85, the woodwinds play a diminution of the melody overtop of the brass and saxophone melody.

Students must be familiar with subdividing the eighth note, as there are eighth note rest entrances and a few eighth note run patterns in the upper woodwinds. These run
patterns are in Concert G melodic minor, so student awareness of this scale pattern would be helpful while learning to execute the notes.

Unit 5: Stylistic Considerations

This piece presents two styles that contrast. The first theme heard is a fanfare, and students should be careful that the opening motif is articulated crisply and that the accented quarter notes are separated as well as accented. Immediately following this opening motif (which occurs several times through the song) is the contrasting melody of the traditional carol. The first trumpets first play this melody with straight mutes and the clarinets at mm. 15. Percussion accompanies, though students will need to be careful of balance. Other voices in the band join in to play the melody at the restatement at measure 33, while the flutes play an accompaniment part overtop that mimics the percussion.

Awareness of the two contrasting styles will be important for students.

Unit 6: Musical Elements

The melody of the carol is presented a total of four times, with an introduction and a bridge between each repetition. The introduction and the bridge sections include the same motif (quarter note, two eighth notes, quarter note) that ties each repetition of the carol together. The key of the piece is Concert G minor, which presents an excellent opportunity to speak to students regarding the use of minor keys. The use of a pedal point is seen at measure 29 in the tenor sax, bass clarinet, and low brass (minus the tuba) while the flutes play the bridge motif before the next repetition of the carol. Also important to note is the use of a Picardy third at the end of the song.
